

# OPT – PM – 02 Polishing machine

## Description

The OPTOKON OPT-PM-02 polishing machine is most ideal for mass production and capable of 16-axis simultaneous polishing. You can easily clean ferrules and change polishing films without mounting / dismounting polishing holders, enabling high workability. Also you can easily and precisely adjust pressure with a pressurizations knob which enables you to flexibly customize the polishing applications according to materials and polishing shapes of ferrules.

## Features

- High Speed Process
- Large Capacity
- FC, SC, ST, LC, MU
- UPC or APC
- Precision Pressure Control
- Ergonomically Designed
- Ease of Use
- Low Insertion Loss
- Low Back Reflection

## Optional Fixtures (I.P.C. - Individual Pressure Control)
